Research Report

THE KLEIN PARTNERSHIP

Date May 2018
TKP Ref 5050

Background

- The Australian Automotive Aftermarket Association (AAAA) has developed and is executing an on-going market research program to provide information and insights to help members develop and grow their business (and by association, the industry).
- This on-going program will:
 - Add value to AAAA membership
 - Provide AAAA with PR and 'influence' opportunities
- The priority opportunity for 2018 was a deep and comprehensive read on the end-consumer's attitudes and behaviours with regards to servicing and enhancing their vehicle.

Objectives

- The overarching objectives of this research were to provide AAAA with information and insights about the Australian consumer's attitudes and behaviours with regards to servicing and accessorising their vehicle.
- In 2018, the study provides an understanding of;
 - The market for vehicle servicing
 - The profile of the independent workshop and the dealership customer
 - The consumer's workshop selection process
 - Decision making on choice of workshop
 - Strengths and weakness of alternative workshop types
 - Drivers and degree of satisfaction with their last service

Summary of Methodology

Who?

- Car owners* who have:
- Had their personal vehicle serviced in the last 12 months, OR
 - Purchased an aftermarket accessory in the last 12 months.

How Many?

Total = 1,499
Had car serviced= 1,390. Purchased accessory= 1,086.

What?

20-minute online survey

Where?

National

When?

7th to 18th February, 2018

**Responsible for the decisions regarding the maintenance and servicing of their car*

Interpretation

- Tests for statistical significance at a 95% confidence level have been conducted on particular subgroups of interest in this survey.
 - If no statistical significance has been highlighted, there are none associated with these subgroups.
 - If there is a statistically significant difference, we can be confident that this difference has not occurred by chance i.e. it reflects a genuine difference for that group compared to the population.
- In the tables and graphs;

Indicates a result that is significantly higher

Indicates a result that is significantly lower

Indicate a result that is not significant at 95% but is notable or of interest

Statistical Margin of Error

<i>n=100</i>	<i>+/- 11.3pts</i>
<i>n=200</i>	<i>+/- 7.2pts</i>
<i>n=400</i>	<i>+/- 3.7pts</i>
<i>n=600</i>	<i>+/- 4.1pts</i>
<i>n=1,000</i>	<i>+/- 3.0pts</i>

Incidence of Car Services and Accessory Purchases in Australia

Respondents who clicked on the survey link and answered the screening questions were representative of the Australian population in terms of age, gender and location.

*Screen out data was then captured to quantify the incidence of servicing and accessory purchases amongst **all** car owners (not just for the market of interest).*

Incidence of Car Services and Accessory Purchases

A Snapshot of Australian Car Owners

In the last 12 months...

- 67% of Australian Car Owners had their car serviced
- 52% purchased an accessory (i.e. a mechanical or electrical part, an accessory or a car care product)
- 47% had their car serviced AND purchased an accessory
- 28% had neither purchased an accessory nor had their car serviced
- 5% had bought an accessory, but had not serviced their car.
- 20% had serviced their car, but had not bought an accessory.

Incidence of Car Services and Accessory Purchases

Age

People who had serviced their car in the past 12 months tended to be older, with an average age of 52 years compared to 50 years for the typical car owner.

Average

- 65+
- 55-64
- 45-54
- 35-44
- 25-34
- 18-24

Incidence of Car Services and Accessory Purchases

Gender

People who purchased an accessory or had their car serviced in the last 12 months were more likely to be Male, but incidence of both activities amongst Females was still significant.

Of all females 35% had bought an accessory (vs. 55% of males) and 49% had serviced their car (vs. 67% of males); females were responsible for 44% of car services.

Incidence of Car Services and Accessory Purchases

Type of Car Owned

Column %	All Car Owners	Had a Service	Bought an Accessory
Sedan	41%	42%	42%
Wagon	7%	7%	7%
Hatch	28%	29%	27%
Coupe	3%	3%	3%
Convertible	2%	2%	2%
Ute / Van	8%	7%	8%
4WD / SUV	30%	29%	31%
Other	2%	1%	1%

People who have serviced their car in last 12 months or had purchased a automotive accessory did not own different types of vehicle.

The Servicing, Repairs and Automotive Accessory Market

To qualify for the main survey, respondents must have owned a car (and been responsible for the decisions regarding the maintenance and servicing of it), and must have:

- *Had their personal vehicle serviced in the last 12 months, OR*
- *Purchased an aftermarket accessory in the last 12 months.*

These respondents are defined as the servicing, repairs and automotive accessory market.

Sample Characteristics

Age & Gender

Gender

Age

Base: **Total** n=1,499: Q64 – Age; Q65 - Your gender?

Sample Characteristics

Location

The market is generally consistent with population statistics in terms of location (albeit slightly more rural).

Profile of Their Car

Profile of Their Car

Make

Body

Year

Base: **Total** n=1,499; Q2. What is the make of the car? (OPEN); Q1. Body?; Q3. Roughly, what year is the car?

Profile of Their Car Specification

Profile of Their Car

Where Bought

Base: **Total** n=1,499: Q6. Where was it bought?; Q4. When you got it was it...

Profile of Their Car

Distance Travelled Per Year

% Driven For Work Purposes

Base: **Total** n=1,499: Q8. Roughly how many kilometres does it travel per year?; Q10. Roughly what % of the car's driving is for work purposes (excluding your commute)?

Profile of Their Car

Modifications Made

Only 15% of vehicles had been modified in some way after purchase.

Of those modified, $\frac{3}{4}$ were to enhance appearance, whilst $\frac{1}{2}$ were to improve performance.

Base: **Total** n=1,499; Q7a. After buying the car, have you modified it ...; Q7b.How have you modified your car? (OPEN)

 ■ Neither agree nor disagree
 ■ Agree
 ■ Strongly agree
 % Agree / Strongly Agree

Base: **Total** n=1,499: Q16. Please tell us the extent to which you agree or disagree with each of the following statements.

Attitudes Towards Mechanics

There was considerable favourability towards mechanics overall.

■ Strongly disagree
 ■ Disagree
 ■ Neither agree nor disagree
 ■ Agree
 ■ Strongly agree
 % Agree / Strongly Agree

Base: **Total** n=1,499; Q16. Please tell us the extent to which you agree or disagree with each of the following statements.

Attitudes

Towards Engagement in Cars and Servicing

26% of respondents held particularly negative attitudes towards their car and servicing, which flowed across all attributes in this grouping.

■ Strongly disagree
 ■ Disagree
 ■ Neither agree nor disagree
 ■ Agree
 ■ Strongly agree
 % Agree / Strongly Agree

Females were significantly more likely to agree that they don't feel confident going into a workshop (29% vs. 21% for males)

The 54% who disagreed that they defer repairs, and the 69% who disagreed that their mechanic talks down to them, are encouraging results.

Attitudes Towards Parts

The opportunity of suppliers appears significant; 42% agreed that alternative parts are as good or better than genuine parts and only 26% disagree that you have to use genuine parts to maintain your warranty.

■ Strongly disagree
 ■ Disagree
 ■ Neither agree nor disagree
 ■ Agree
 ■ Strongly agree
 % Agree / Strongly Agree

11% believed alternative brands are comparable to genuine parts, yet will only fit original/genuine parts to their car.

Attitudes

Towards Knowledge when Servicing

The majority of respondents believe they understand what a service entails, and are able to recognise an unnecessary repair.

Attitudes

Towards Cars of The Future

Interest in electric/hybrid cars is significant, with 1 in 3 expressing an interest if the car was affordable.

■ Strongly disagree ■ Disagree ■ Neither agree nor disagree ■ Agree ■ Strongly agree

Base: **Total** n=1,499; Q16. Please tell us the extent to which you agree or disagree with each of the following statements.

Warranties & Service Agreements

*Service Agreements include Capped/Fixed Price servicing,
Free Servicing or Pre-paid servicing.*

Service Agreements and Warranties

3 in 5 cars were not under warranty or under a service agreement.

		All Cars		
		Have a Service Agreement?		
		No	Yes	Total
Under Warranty?	No	58%	5%	63%
	Yes	17%	20%	37%
Total		75%	25%	100%

		Cars Aged 3 Years or Less		
		Have a Service Agreement?		
		No	Yes	Total
Under Warranty?	No	6%	1%	8%
	Yes	35%	57%	92%
Total		41%	59%	100%

Over 9 in 10 (92%) cars less than 3 years old were under warranty, while almost 6 in 10 (59%) had a service agreement. 57% had both.

Service Agreements and Warranties

Type of Service Agreement on Car

■ All Cars
■ Cars Aged 3 Years or Less

Type of Warranty on Car

Of those under warranty, the majority are under new car warranty.

Only a minority were under an Extended Warranty (5% of all vehicles)

Service Agreements and Warranties

Have Service Agreement by Age of Car

People who had their cars for 7 years or less were more likely to have a service agreement.

Service Agreement includes Capped/Fixed Price servicing, Free Servicing or Pre-paid servicing

Base: **Total** n=1,499; Q3. Age of car; Q11. Do you have any of the following service agreements for your car?

Warranties & Service Agreements

Extended Warranties

Have You Ever Purchased an Extended Warranty?

Most respondents had never experienced an automotive extended warranty, and the concept of it held little appeal.

However, those who have had one in the past (or currently have one) tended to be likely to buy one in the future.

Likelihood to Purchase an Extended Warranty in Future

		"I will purchase an extended warranty on my next vehicle"		
Row %		Disagree	Neutral	Agree
Ever Purchased an Extended Warranty?	Currently Have One	9%	29%	62%
	Have Bought One in the Past	24%	33%	43%
	Never Bought One	52%	35%	13%
Total		46%	35%	20%

Base: **Total** n=1,499: Q9 - Is it...; Q12. Have you ever purchased an extended warranty for a car?; Q16. Please tell us the extent to which you agree or disagree with each of the following statements – 'I will purchase an extended warranty on my next vehicle'

Warranties & Service Agreements

Service Agreements

Have You Ever Purchased a Service Agreement*?

*Either Capped, Fixed or Pre-Paid

The opportunity appears to be winning over the 52% who have not formed an opinion on Capped Price Servicing

Perceptions of the value of Service Agreements amongst those who have had or currently have a service agreement were mixed.

Attitudes Towards The Value of Service Agreements

		“Capped or Fixed Price Servicing is a Rip Off”		
Row %		Disagree	Neutral	Agree
Ever Purchased a Service Agreement?	Currently Have One	34%	43%	23%
	Have Bought One in the Past	26%	44%	30%
	Never Bought One	12%	57%	31%
Total		19%	52%	29%

Base: **Total** n=1,499: Q11. Do you have any of the following service agreements for your car?; Q13. Have you ever purchased or been provided with a service agreement such as Capped/Fixed/Pre-paid servicing? Q16. Please tell us the extent to which you agree or disagree with each of the following statements – ‘Capped of Fixed Price servicing is a rip off’

Warranties & Service Agreements

Familiarity and Satisfaction With Service Agreements

People with a current service agreement claimed to be quite familiar with what their agreement covers, and tended to be generally satisfied with their agreement.

Satisfaction with Service Agreement

Last Service

Respondents who had their car serviced in the last 12 months were asked a set of questions about their most recent service.

Last Service

Service Provider Used

Last Service

Service Provider Used by Age of Car

People with cars aged 5 years or less were more likely to get their car serviced at a dealership.

Last Service

Catalyst To Get Car Serviced

The length of time and the number of kilometres were of comparable import in prompting a service.

Column %	Service Provider Used					Total
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	I did it myself	
The length of time since last service	54%	48%	51%	31%	45%	49%
Number of km's since last service	45%	46%	44%	38%	55%	46%
Minor issue with the car	15%	11%	7%	14%	13%	10%
Service light	7%	6%	7%	5%	11%	7%
The workshop contacted me	7%	2%	13%	7%	3%	7%
Major issue with the car	6%	4%	2%	12%	5%	4%
Other	0%	5%	3%	5%	5%	4%
n=	199	521	513	42	92	1,390

Base: **Had Service in L12M** n=as above: Q17/Q38. What prompted you to get your car serviced / service your car? by S5. At what type of workshop did you last get your car serviced? (Multiple responses permitted)

Last Service

Service Providers Considered by Service Provider Used

59% of respondents considered an Independent Workshop for their most recent service.

Column %	Service Provider Used					Total
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	I did it myself	
Chain Workshop	100%	21%	14%	40%	28%	31%
Independent Workshop	61%	100%	19%	50%	49%	59%
Car Dealership	37%	20%	100%	40%	26%	53%
Mobile Mechanic	24%	10%	11%	100%	23%	16%
n=	199	521	513	42	92	1,390

There did not appear to be a significant amount of 'cross-shopping', with 55% of respondents who did not consider an alternative provider type. Consideration of Independent workshops by those who used a Dealership – and vice versa – was only about 1 in 5 respondents.

Those who used a Dealership were notably less likely to consider a Chain workshop; only 14% of those who used a Dealership considered a Chain Workshop.

Last Service

Whether Obtained Quote by Service Provider Used

Most respondents did not get a quote before deciding where to get their car serviced.

Column %	Service Provider Used					Total
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	I did it myself	
Obtained Quote	38%	26%	21%	50%	15%	26%
Didn't Obtain Quote	62%	74%	79%	50%	85%	74%
Column n=	199	521	513	42	92	1,390

Those who used a chain workshop or a mobile mechanic were more likely to get a quote.

Last Service

Require Additional Work by Service Provider Used

It would appear 1 in 4 services require additional work, with additional work more likely amongst those who used a Chain workshop.

		Service Provider Used					Total
Column %		Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	I did it myself	
Did it require anything over the standard service?	Yes	30%	26%	21%	14%	17%	24%
	No	66%	70%	76%	79%	80%	73%
	Not Sure	5%	3%	3%	7%	2%	4%
Column n=		199	521	513	42	92	1,390

Given that newer cars were a) less likely to require parts and labour over and above the standard service, and b) more likely to be serviced at a Dealership, it is understandable that cars serviced by a Dealership were slightly less likely to require additional work (only 21%).

Profile of Last Service

Additional Work Required

DIFM (Do it For Me) - %

Total	16

Last Service – ‘Do It For Me’ (D.I.F.M.)

Last Service - DIFM

Relationship with Service Provider Used

Respondents appeared to be very loyal to their car service provider, with 3 in 5 claiming its the place they always go to.

Last Service - DIFM

Relationship with Service Provider Used

How Long (in Years) Have You Been Going There?

The length of the relationship with a service provider is significant (on average 6 ½ yrs).

	Service Provider Used			
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic
Average Number of Years	5.0	8.5	5.0	4.4

Base: **DIFM** n=1,346; Q20. Thinking about the specific workshop where you had your car serviced, about how long in years have you been going there?

Last Service - DIFM

How Did You Find the Workshop?

Last Service - DIFM

Explanation of Work Pre-Service

Before the service, 2 out of 3 workshops explained both what work was involved, AND the process if additional work was required.

Before the Service, Did The Workshop Explain...

■ ...what work was included/involved in your service ■ ...the process if additional work was required

A link exists between being given an explanation and being satisfied with the service. Respondents who had both elements explained to them were more likely to be completely satisfied (57%), whilst those who had neither explained to them were less so (29%).

Column %	Service Provider Used				Total
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	
Explained work involved, but not process	7%	10%	15%	17%	11%
Explained process, but not work involved	7%	8%	8%	8%	2%
Explained Both	68%	79%	68%	64%	64%
Explained Neither	7%	15%	14%	17%	13%

* Small Sample

Base: DIFM n=1,346, Chain workshop n=204, Independent workshop n=539, Car dealership n=534, Mobile Mechanic n=46; Q23. Before the service, did the workshop explain...

Last Service - DIFM

% Sought Approval For Any Additional Work Required

Most workshops sought approval before doing additional work.

Interestingly, satisfaction with their service did not differ by whether approval was sought or not.

** Small Sample*

Base: **Required Additional Work**: Chain workshop $n=65$, Independent workshop $n=145$, Car dealership $n=124$, Mobile Mechanic $n=13$; Q26. Did the workshop seek your approval before going ahead with the additional work?

Last Service - DIFM

Additional Work Undertaken

Did the Mechanic Go Ahead With Any of the Additional Work?

Those who used a Dealership were more likely to not undertake the additional work.

It does seem that about 20% of additional work required was not completed in one service.

* Small Sample

Base: **Required Additional Work:** Chain workshop $n=65$, Independent workshop $n=145$, Car dealership $n=124$, Mobile Mechanic $n=13$; Q28. Did the mechanic go ahead with any of the additional work?

Last Service - DIFM

Who Sourced The Parts?

The vast majority of parts were sourced via the mechanic.

Amongst the few who source parts themselves, there was no predominant source of replacement parts.

Who Sourced?

- I sourced them
- The mechanic sourced them

Where From?

Last Service - DIFM

Type of Parts Sourced

Who Sourced?

- I sourced them
- The mechanic sourced them

Type of Parts Sourced

Those who sourced replacement parts themselves did not seem to show a strong preference for either OEM or aftermarket parts.

Last Service - DIFM

Choice of Parts When Additional Work Required

Were You Offered a Choice of Parts?
(i.e. aftermarket vs original, brands, etc)

Would You Like To Have Been Offered?

Last Service - DIFM

Choice of Parts

Did Not Want to
Be Offered a
Choice in Parts

39%

Why Not?

Last Service - DIFM

Why Was Additional Work Not Undertaken?

Additional Work
Not Undertaken
When Required

7%

Cost was the #1 reason additional work was not undertaken (albeit it was rare for additional work not to be done when needed).

Small Sample

Last Service - DIFM

How Well Did The Workshop Explain...

Respondents were generally happy with the explanations provided by their workshop.

% Explained Well	What was done on your service	The additional work undertaken*	What work may be needed in future
Chain Workshop	49%	50%	43%
Independent Workshop	58%	63%	53%
Car Dealership	47%	51%	34%
Mobile Mechanic	48%	55%	48%
Total	52%	56%	44%

*If additional work was required (n=335)

Dealerships did a significantly poorer job of explaining future work.

Base: **DIFM** n=1,298; **Additional Work Required** n=335: Q27. How well did the workshop explain the additional work required?; **DIFM** n=1,298: Q36. When you collected your car, how well did the workshop explain what was done on your service?; Q37. How well did the mechanic inform you about what work may be required in the future for the car?

Last Service – D.I.Y.

Last Service - DIY

How Long Have You Been Servicing Your Own Car?

On average, DIYers had been doing their own service for 15 years.

Last Service - DIY

Extent of DIY Capabilities

There appears to be a clear hierarchy with regards the servicing tasks they feel confident addressing themselves.

Last Service - DIY

Sourcing Replacement Parts

There was a slight preference amongst DIYers to be buying from Automotive parts retailers and to be buying aftermarket parts.

Where Did You Source Parts From?

Type of Part(s) Sourced

Choosing a Workshop

Background to Max Diff Analysis

- MaxDiff is an approach for obtaining preference/importance scores for a list of multiple items - be they brand preferences, brand images, product features, advertising claims, etc.
- MaxDiff (otherwise known as Best-Worst) involves survey takers indicating the 'Best' and the 'Worst' options out of a given set.
- Respondents typically complete a dozen or more such sets where each set contains a different subset of items. The combinations of items are designed with the goal that each item is shown an equal number of times and pairs of items are shown an equal number of times. Each respondent typically sees each item two or more times across the MaxDiff sets.
- Advantages:
 - MaxDiff scores demonstrate greater discrimination among items and between respondents on the items.
 - The MaxDiff question is simple to understand, so a broader range of respondents - ie from a variety of educational and cultural backgrounds - can provide reliable data.
 - Since respondents make choices rather than expressing strength of preference using some numeric scale, there is no opportunity for scale use bias.
- The resulting item scores are placed on a 0 to 100 point common scale – which shows relative importance - and sum to 100 i.e. an attribute with 10% would be twice as important as an attribute with 5%.

Which of one of these features do you regard as the most important and which do you regard as the least important?

Task 2 of 10

Please select one from the 'most' and one from the 'least' column. You must choose a different item in each column.

Most important		Least important
☐	Giving an additional discount based on your annual spend	☐
☐	Competitive prices	☐
☐	Providing exclusive benefits for being a business customer	☐
☐	A wide range of brands	☐
☐	Telephone Account Mgr/Rep	☐

EXAMPLE

Choosing a Workshop

Factors of Importance

% Likelihood Ranked #1

It appears that choosing workshop is a 'people' based decision.

Cost and voiding a warranty did not appear as a major determinant of which workshop people chose to use.

Choosing a Workshop

Factors of Importance – Segment Identification

Grouping respondents by their decision making with regards to choice of workshop identified 4 segments.

Column %	Segment				Total
	'Specialist'	'Expertise'	'Ease'	'Relationship'	
The skills and training of the mechanics	15%	21%	10%	11%	15%
Done a good job in the past	5%	17%	8%	15%	11%
Trust the staff	7%	13%	7%	17%	11%
Giving me advanced notice on future work	5%	20%	7%	7%	10%
Use only genuine parts	10%	4%	6%	2%	6%
I deal directly with the person who works on my car	2%	6%	4%	12%	5%
Specialises in my brand of car	30%	2%	5%	1%	5%

Using them would not void my car warranty	3%	1%	6%	2%	4%
Manufacturer dealer	12%	1%	4%	0%	3%
n=	269	415	456	206	1,346

Base: **DIFM** n=1,346; Q49 - When deciding where to get your car serviced, which attribute was the MOST important to you and which one was LEAST important? MAXDIFF, Segments MAX DIFF

Choosing a Workshop

Factors of Importance – Correspondence Analysis by Segment

Grouping respondents by their decision making with regards to choice of workshop identified 4 segments.

Base: **DIFM** n=1,346; Q49. When deciding where to get your car serviced, which attribute was the MOST important to you and which one was LEAST important? (MaxDiff Analysis)

Choosing a Workshop

Workshops Used by Segment

83% of 'specialists' (i.e. people looking for a workshop that specialises in their brand of car and uses only genuine parts) had their car last serviced at a Dealership.

Dealerships attract nearly all of their customers from the 'Specialists' and the 'Ease' groupings.

Workshop Share of Segment

Column %	Segment			
	'Specialist'	'Expertise'	'Ease'	'Relationship'
Chain workshop	6%	18%	17%	17%
Independent workshop	9%	58%	27%	72%
Car dealership	83%	17%	50%	6%
Mobile Mechanic	2%	4%	4%	1%
n=	260	403	434	201

People looking for a 'relationship' with their motor mechanic were significantly more likely to use an independent.

People looking for a 'relationship' represent 28% of an independent workshops customers

Segment Share of Workshop Customers

Row %	Segment				Row n
	'Specialist'	'Expertise'	'Ease'	'Relationship'	
Chain workshop	8%	37%	38%	18%	199
Independent workshop	5%	45%	23%	28%	521
Car dealership	42%	14%	42%	2%	513
Mobile Mechanic	12%	38%	43%	7%	42

Base: **DIFM** n=as above: Q49. When deciding where to get your car serviced, which attribute was the MOST important to you and which one was LEAST important? (MaxDiff Analysis); S5. At what type of workshop did you last get your car serviced?

Choosing a Workshop

Segments by Age of Car Owned

■ 'Specialists' ■ 'Expertise' ■ 'Ease' ■ 'Relationship'

'Specialists' and 'Ease' customers were more likely to own newer cars, whilst 'Relationship' and 'Expertise' customers were more likely to own older cars.

Choosing a Workshop

Factors of Importance – Non-Dealerships Relative to Dealerships

Relative Importance (Non-Dealership Indexed to Dealership)

A score of 100 means Non-dealer customers placed identical weight on this aspect as Dealer customers.

A score of 200 means Non-dealer customer placed twice as much emphasis on that aspect and a score of 50 means they placed half as much emphasis.

People who did not visit a Dealership placed more emphasis on dealing with the mechanic, being locally owned, being recommended, trust and flagging future work.

They did place greater weight on Lowest price, but it was not a major factor nor differentiator.

Choosing a Workshop

Why Choose a Dealership?

38% of those who used a dealership did so due to warranty or the belief that it is mandatory.

Choosing a Workshop

Why Choose an Independent?

Base: **Serviced at Independent or Chain Workshop** n=812; Q51 - Why did you choose an independent mechanic rather than a dealership for servicing your car?

Satisfaction With Most Recent Service

Satisfaction with Most Recent Service

Likes

Base: **DIFM** n=1,346; Q48. What's the #1 thing you liked about the last time you had your car serviced? Other things? (OPEN)

Satisfaction with Most Recent Service

Dislikes

Most respondents could not cite an issue with their last service.

Those who used a Dealership however were more likely to cite an issue (49%).

1 in 6 cited issues with cost, or perceptions of being ripped off.

Satisfaction With Aspects of Service

% Rated Excellent	Service Provider Used			
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic*
The cost	35%	42%	24%	34%
The expertise of the technician	51%	66%	43%	60%
All elements of the service completed first time	52%	63%	49%	60%
The service done within expected timeframe	53%	65%	54%	51%
The cleanliness of the car after the service	39%	49%	50%	45%
How clearly they explained the work they did on your car	54%	64%	47%	48%
How quickly you could book the service	51%	58%	46%	43%
The quality of replacement parts or consumables used	46%	53%	42%	45%
Convenient location	56%	58%	33%	54%
Open at convenient times	48%	49%	40%	41%
The business being neat and tidy	40%	44%	53%	42%
Access to alternative transport	32%	29%	29%	42%
Value for money	42%	49%	25%	43%
Seeking authorization before doing additional work	58%	63%	50%	51%
Treated with respect	56%	69%	47%	62%
Open and honest	52%	66%	38%	62%
Eager to help	40%	55%	31%	48%
Flexible	40%	49%	30%	50%
n=	117	318	313	28

Higher overall satisfaction shown by Independent Workshop users was consistent across individual measures, with the exception of the cleanliness of the car, the business being neat and tidy and access to alternative transport.

* Small Sample

Base: **DIFM** n=as above; Q53. Thinking of your last service, how would you rate the workshop on the following...; S5. At what type of workshop did you last get your car serviced?

Satisfaction with Most Recent Service

Drivers of Satisfaction

Relative Influence in Driving Satisfaction (%)

The most influential determinants of satisfaction were the expertise of the technician, the service being completed first time, that they are treated with respect and the cost.

Influence is determined via regression modeling, where we examine the impact of performance on the overall score. Relative influence is presented, as all factors are of importance.

Satisfaction with Most Recent Service

Drivers of Satisfaction by Service Provider Used

% Relative Importance	Service Provider Used		
	Chain workshop	Independent workshop	Car dealership
The expertise of the technician	8%	15%	8%
All elements of the service completed first time	7%	10%	12%
Treated with respect	0%	14%	11%
The cost	17%	13%	8%
Eager to help	0%	10%	9%
Open and honest	0%	0%	13%
How clearly they explained the work they did on your car	9%	9%	9%
The quality of replacement parts or consumables used	12%	10%	6%
The service done within expected timeframe	0%	6%	8%
Seeking authorization before doing additional work	8%	0%	6%

How quickly you could book the service	6%	0%	0%
The business being neat and tidy	7%	0%	0%
Open at convenient times	0%	0%	0%
The expertise of the technician	8%	15%	8%
n=	117	318	313

Those who had their vehicle serviced at a Independent Workshop placed greater emphasis on the cleanliness of the car and less emphasis on the workshop being open and honest. Is this a function of what is expected at these channels?

Influence is determined via regression modeling, where we examine the impact of performance on the overall score. Relative influence is presented, as all factors are of importance.

Satisfaction with Most Recent Service

Likelihood to Recommend – Net Promoter Score (NPS)

Reflective of their loyalty and high levels of satisfaction, respondents were predisposed to recommending the workshop they last used.

Net Promoter Score

Recommendation was significantly higher amongst those who had their car service at an Independent Workshop.

Net promoter score = % promoters - % detractors*

Base: **DIFM** n=1,346; Q54. How likely would you be to recommend this workshop to a friend or family member who are looking to get their car serviced? Assuming that the workshop is relevant to their car.

Perceptions of Service Providers

Perceptions of Service Providers

	%	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic*
Have the lowest price		29%	47%	11%	12%
Offer service agreements		19%	16%	65%	9%
Have a great reputation		27%	50%	45%	17%
Have trustworthy staff		33%	60%	51%	28%
Have friendly and welcoming staff		42%	62%	59%	32%
Are locally owned		14%	78%	25%	30%
Have highly skilled mechanics		42%	65%	67%	36%
Allow you to deal directly with the mechanic		18%	68%	19%	42%
Use only genuine parts		19%	25%	76%	12%
Use the best / premium brands of parts		25%	35%	73%	15%
Gives you parts options and alternatives		35%	65%	31%	27%
Can service all makes of car		56%	72%	33%	47%
Can service complex issues		32%	55%	70%	17%
Have convenient locations		45%	54%	46%	39%
Are open at convenient times		47%	60%	52%	43%

Have long trading hours		28%	38%	29%	28%
Provide a clean, pleasant environment		42%	43%	73%	17%
Give you access to replacement car		10%	16%	64%	3%
Advise you on future work that will be needed		39%	65%	61%	32%
Return the car clean		29%	39%	67%	15%

There were clear differences in how the different forms of workshop are perceived. Independent workshops have some clear advantages over the dealerships.

Perceptions of Service Providers

Independent Workshops Relative to Dealerships

% Difference (Independent % minus Dealership %)

In comparison to the Dealerships, Independents' greatest 'wins' are on being locally owned, allowing them to deal directly with the mechanic, being able to service all makes, having the lowest price and giving them parts options.

Perceptions of Service Providers

Correspondence Analysis

Independent Workshops are distinctive on the basis of allowing you to deal directly with the mechanic and being locally owned.

INTERPRETING THE MAP

1. The closer an attitude or supplier is to the midpoint, the less it stands out (and vice versa)
2. The closer an attitude is to a supplier, the more it represents a stand-out **for that supplier**
3. The closer suppliers are together, the less they stand out from each other on this topic.
4. Attitudes which are opposite to a supplier apply in a negative sense.
5. The clover leaf shows a supplier's primary stand-out area.

Perceptions of Service Providers

Likelihood to Use in the Future

Independent Workshops achieved the highest propensity to use in the future.

Likelihood to Use in Future by Service Provider Used

% Likely to Use (JUSTER)	Service Provider Used					Total
	Chain workshop	Independent workshop	Car dealership	Mobile Mechanic	I did it myself	
Chain Workshop	77%	35%	40%	52%	37%	44%
Independent Workshop	57%	86%	48%	68%	54%	65%
Car Dealership	40%	32%	83%	44%	30%	52%
Mobile Mechanic	39%	34%	33%	71%	33%	35%
Column n=	199	521	513	42	92	1,390

Likelihood To Purchase

Car Parts, Accessories or Car Care Products

Base: **Total** n=1,499; Q62. How likely would you be to purchase each of the following car parts, accessories or car care products for your current car?

Key Out-takes

Key Out-takes

The Independent Workshops

- There is very little evidence to suggest Independent Workshops are doing much wrong.
- They over-index with female customers who are a significant proportion of vehicle servicing, and there is opportunity to slightly tailor their offer to meet the needs of females.
- They lead on the key drivers of workshop choice – people aspects.
 - They – specifically the owner and the person who works on their vehicle – are closer to the customer and customers like that.
 - Independent workshops are more trusted and trustworthy.
 - Independent workshops do a better job of explaining future work.
- They generate greater satisfaction than Dealerships in servicing, and this results in customers being more likely to recommend them. Given the strength of recommendation, consideration should be given to a referral program.
- They have high share particularly amongst older cars.

Key Out-takes

Opportunities

- For workshops to be more proactive in;
 - Notifying customers of the need for an upcoming service.
 - Flagging future work required on the car.
- 'Invest' in the mechanics.
 - Workshops need to promote the skills and training of the mechanics.
 - Given the emphasis placed on the mechanic and the trust placed in them, there is opportunity to build direct and strong relationships with customers.
- There is currently a pre-disposition towards Dealerships amongst people with new cars. A customer with an old car might buy a new one, so make sure they know you can service it as they appear to value the existing relationship.
- The 'Price Lever' is not one you need to pull hard.

Key Out-takes

Opportunities

- A lot of consumers don't understand the facts, and there is opportunity to make them aware that...
 - A non-dealer workshop will service to manufacturer specifications as well as anybody.
 - A dealer stamp in the logbook is of no material benefit to resale value.
 - A warranty will not be voided through a non-dealer service.
 - The consumer has a genuine choice of parts.
- Service agreements appear to be a significant and growing threat to the independent channel. Think about the opportunity that could be created through collectively creating an aftermarket industry service agreement equivalent.
- There is a groundswell of support for aftermarket parts and accessories, and a significant portion value being offered a choice. Workshops should focus on offering choice of parts.
