On behalf of the Australian Automotive Aftermarket Association Board of Directors, we invite you to join fellow AAAA members for an industry networking event.

Today, our aftermarket industry continues that search for new trends and product ideas for customers to enhance or modify their vehicles for a specific use. However, changing government attitudes and increasing regulation, combined with new vehicle technologies are substantial and imminent issues that present challenges to the ability of companies to design, develop and market these new products.

How well are we anticipating and addressing these issues?

Luke Truskinger, Managing Director of the Auto Innovation Centre will speak about new vehicle technology and how this affects current and future product design and testing. Lesley Yates, Director of Government Relations and Advocacy will speak on the vehicle modifications government is worried about, which auto aftermarket products are currently under intense scrutiny and the AAAA's advocacy response.

You are most welcome to invite your colleagues from the industry as your guests to this forum for the automotive industry.
