

SA Business COVID-19 Restrictions and Resources

As of 7 December

While there has been an easing of some restrictions, it is still strongly recommended that people continue to work from home where possible. Our industry is not included in the defined public activity and therefore not subject to restrictions.

However, having a COVID-19 Safety Plan in place will help minimise risk of transmission of COVID-19 on your premises. While it is not compulsory in our industry, businesses should consider the benefits of completing a voluntary COVIDSafe plan.

Ensure you have completed the plan in consultation with your workers, then share it with them.

You must review the following requirements before completing your COVIDSafe plan:

- Physical Distancing
- Four Square Metre Rule
- Face Masks
- Self-isolation and Quarantine
